The total count of all the objects that john is possessing at time t6 is 1, because
- [the_milk] is the list of all the objects that are possessed by john at time t6,
  because
  - the_milk is possessed by john at time t6, because
    - time t6 comes after time t5, and
    - the_milk is possessed by john at time t5, because
      - time t5 comes after time t4, and
      - the_milk is possessed by john at time t4, and
      - there is no evidence that the_milk is not possessed by john at time t5.
    - there is no evidence that the_milk is not possessed by john at time t6.
- The list [the_milk] is generated after removing duplicates from the list [the_milk],
  because
  - The list [] is generated after removing duplicates from the list [].
- 1 is the length of the list [the_milk], because
  - 0 is the length of the list [].
